

## Skinny Sculpt

Subcutaneous adipose (fat) tissue consists of fat cells that are held in a gel of a fibrous proteins, polysaccharides, nutrients, and waste products known as the interstitial matrix. These fibers are normally flushed clean by fluids that circulate in the matrix; however with age or obesity this process can slow down and waste material from cellular metabolism can accumulate in the extracellular matrix. If this material hardens, the connective tissue becomes inflexible, locking the fat cells into place. As weight is gained, these immobile pockets of fat cells expand and bulge upwards toward the surface of the skin, creating what is known as cellulite. This process is more common in women and occurs mostly in the thighs, hips, waist, buttocks, arms and abdomen where adipose tissue is concentrated.

Mesotherapy is a technique that employs micro-injections to deliver medications and homeopathic substances such as vitamins, minerals, amino acids and enzymes directly into the layer just beneath the skin where damaged connective tissue resides. French physician, Michel Pistor, developed this technique in 1952 and today thousands of physicians worldwide practice Mesotherapy for healing or corrective treatments.

**Skinny Sculpt** is a topical enhancement cream, formulated with some of the same ingredients that are commonly used in the micro-needle therapies.

**Skinny Sculpt** is formulated to provide maximum absorption through the skin. Key ingredients, (**Deoxycholic acid** and **Phosphatidyl choline**) are bio-identical compounds similar to what the body produces. These lipid soluble compounds are essential to the systematic process of action. The small size of their molecules allow for these compounds to easily pass between the cells. Both **Deoxycholic acid** and **Phosphatidyl choline** are unique carriers for nutrient transport throughout internal membranes.

**Skinny Sculpt** may help many patients achieve the same results with or without other Mesotherapy procedures. Whether to enhance and speed up results from the therapy injections, or to use as a stand alone product, **Skinny Sculpt** will deliver results!

### Skinny Sculpt

For cellulite

- dissolve excess fat deposit
- improve blood flow
- improve lymphatic draining

### Skinny Sculpt

For localized fat reduction

- assists in the breakdown of existing fat cells
- assists in blocking cells from storing fat

### Skinny Sculpt

For face rejuvenation

- enhances elastin production and collagen stimulation

### Skinny Sculpt

Is an alternative choice to

- Mesotherapy
- Lipo-Dissolve
- Smart-Lipo
- Other aesthetics procedures

## TESTIMONIALS

"This stuff really works! Since we introduced Skinny Sculpt into our meso-injection program, results have been outstanding. The skin seems to tighten on the areas where fat deposits are being removed. Skinny Sculpt is a necessity for physicians wanting great patient results."

*E.W. McDonagh, DO - Kansas City, MO*

"I wanted to let you know how thrilled I am with your product Skinny Sculpt. Before I recommended Skinny Sculpt, I first began using the cream on my thighs to see if the texture would be improved with the cream alone. I can truthfully say that in less than 2 weeks, my thighs had less puckering, and even though the cellulite didn't totally resolve, my legs looked better. My patients have reported seeing tightening of the skin and improved texture of the skin. For those patients using it after liposuction, there is a definite resolution of the loose skin when they begin using it soon after the surgery."

*C. G. Mussenden, MD - Lanham, MD*

"Mesa Natural Medicine Center is a heavily visited clinic by people of all ages, ethnicities and genders. With the continuous number of concerns we receive a day, weight loss always outnumbers the rest. Skinny Sculpt has turned out to be a product of interest for many of our weight loss patients. Through the help of Skinny Sculpt weight loss patients report very positive results. Reports such as 10-15lbs of weight loss to even smoother skin. I would highly recommend Skinny Sculpt to patients considering weight loss assistance."

*Simon Sung, NMD - Mesa, AZ*

"We began to use Skinny Sculpt about one year after we started doing Mesotherapy procedures on our patients. Many of our patients have lost significant amounts of weight and have poor skin quality. Mesotherapy helps this problem greatly, but the addition of the Skinny Sculpt is really making a difference in these ladies. Their stretch marks and other areas show real improvement. Keep up the good work on new and exciting products!"

*Gaylen Hayes, DO - Paris, TX*

"The results from patients using Skinny Sculpt have been very impressive. Patients are saying that they can see changes in the skin tone in as early as two weeks. I am now encouraging my patients to take this less expensive, safer, and less painful route. I believe this transdermal application will be the future of Mesotherapy."

*G.M. Parker, DO - Amarillo, TX*

## Tips for success:

- Use 2X daily
- Choose one area at a time to treat
- One full pump for every 6 square inches
- Use after a hot bath or shower, when pores are open.

## Specialized areas for treatment:

- Love handles
- Inner thighs
- Hips & waist
- Double chin
- And many more!

## KEY INGREDIENTS

**Deoxycholic Acid:** Assists in the breakdown of fat for efficient secretion and conversion from Cholic acid. Facilitates fat emulsification from food and assists in the distribution of energy.

**Hyaluronic Acid:** Component of connective tissue whose function is to cushion, lubricate & plump.

**Phosphatidyl Choline:** Assists in the elimination of fatty deposits.

**Allantoin:** Healing, moisturizing, soothing and anti-irritating, keratolytic & non-toxic. Commonly used in dermatological applications.

**Vitamins A, C, & E** are included in the formula and provide powerful anti-oxidant protection.

**Shea butter** provides ultra-moisturizing benefits.

## Smooths & Improves Skin Texture

Tightens, Tones, Sculpts, Rejuvenates

Targeting Fat Spots, Cellulite, Body,  
Face and Neck
