

Skinny Sculpt

Skinny Sculpt is a topical cream designed to help dissolve fat, soothe the skin and improve skin texture. Each full press pump delivers 60 mg. of bio-identical compounds proven to assist in lipid metabolism and fat dissolution.

Skinny Sculpt is formulated to provide maximum absorption through the skin. Key ingredients (Deoxycholic acid and Phosphatidyl choline) are bio-identical compounds similar to what the body produces. These lipid soluble compounds are essential to the systematic process of action. The small size of their molecules allow for these compounds to easily pass between the cells. Both Deoxycholic acid and Phosphatidyl choline are unique carriers for nutrient transport throughout internal membranes.

Apply yourself skinny!

Achieve Results Without Needle Therapy

- ✓ **Pharmaceutical Grade and Therapeutically Dosed**
- ✓ **Highly Targeted Fat Reduction**
- ✓ **100% All Natural Ingredients**
- ✓ **Each Pump Delivers 60mg of Key Meso Ingredients**
